

# DE-STA-CO INTRODUCES "ERGO-BOOST" Manual Assist Lifters

**"Ergo-Boost" Manual Assist Lifters are Ideal for parts that are:  
Too large, too heavy, or any part which would normally  
require (2) or more people to move into position**

**Simplified Design** Uses standard off-the-shelf modular components for fast installation and quick set-up.

**No Weldments** Field adjustable for quick tool change to fit multiple part configurations.

**Remote Part Controls** Pick-up, lift, lower and release from hand control. Part control is maintained in the event of air pressure loss.

**Design Capabilities** Complete in-house design team for custom Manual Assist Solutions.

***"Boost" your productivity while maintaining a safe work environment.***
